

Jubiläumsreihe

Anlässlich des 125-jährigen Bestehens der Universität St.Gallen veranstaltet das Öffentliche Programm eine ausserordentliche Jubiläumsreihe. Innerhalb dieser eröffnen unsere sechs Schools Podiumsdiskussionen, die zu aktuellen Themen Studierende, Alumni, Experten und Interessierte zusammenbringen. Anliegen dabei ist, mithilfe von Multiperspektivität intergenerationellen Dialog in Bezug auf Vergangenheit, Gegenwart und Zukunft zu fördern.

Wissen schafft Wirkung.
Wir sind HSG.

Programm

16. November 18.15 – 19.45 Uhr Atrium im SQUARE	School of Humanities and Social Sciences From the Anthropocene to the Pluriverse: Planetary Sustainability in an Age of Global Climate Disruption
23. November 18.15 – 19.45 Uhr Atrium im SQUARE	Law School Bekämpfung von Desinformation auf Online-Plattformen
30. November 18.15 – 19.45 Uhr Atrium im SQUARE	School of Computer Science Zukunft der Mobilität: Wenn Algorithmen unsere Wege beeinflussen
7. Dezember 18.15 – 19.45 Uhr Atrium im SQUARE	School of Economics and Political Science Globalization in Times of Geopolitical Shifts
14. Dezember 18.15 – 19.45 Uhr Atrium im SQUARE	School of Finance Zukunft der sozialen Sicherung – Haben wir auf Sand gebaut?
21. Dezember 18.15 – 19.45 Uhr Atrium im SQUARE	School of Management und School of Medicine Wie lange werden wir in Zukunft leben? Longevity – Neue Technologien für das gesunde Altern – der neue Megatrend für Jung und Alt.

16 November 2023, 18.15–19.45

From the Anthropocene to the Pluriverse: Planetary Sustainability in an Age of Global Climate Disruption

School of Humanities and Social Sciences (SHSS-HSG)

According to many scientists, the geological epoch of climate equilibrium known as the Holocene – which has allowed humans to become the protagonists of natural history and develop their civilizations – is now over. Extracting and burning fossil fuels has altered the Earth's metabolism: the concentration of carbon dioxide in the atmosphere has surpassed 400 parts per million, almost twice the amount that has characterized the 11,700-year long ecological niche of the Holocene. We are living in a dangerous new climate regime, which brings us back to the extreme environmental conditions that our human ancestors experienced during prehistory. The name for this current epoch is the “Anthropocene”, a time of global environmental crisis. As a solution to the dilemmas posed by the Anthropocene, together with experts in urban studies, public law and design, we will explore the potential of a utopian narrative coming from the Global South: the “Pluriverse”, a paradigm for planetary sustainability.

After the event, you are cordially invited to an aperitif.

Speaker
Prof. Ph.D. Federico Luisetti
Associate Professor of Italian culture and society, School of Humanities and Social Sciences (SHSS-HSG), University of St.Gallen

Speaker
Prof. Dr. Elisa Fornalé
Assistant Professor, World Trade Institute, University of Bern

Speaker
Flurina Gradin
Research Assistant at the faculty of Italian Culture and Society, School of Humanities and Social Sciences (SHSS-HSG), University of St.Gallen

Moderation
Sieglinde Geisel
Journalist, literary critic, book author and writing coach, based in Berlin
